

# Intriguing Development

## Your proven development partner

Since 1997, Intriguing Development has been helping software manufacturers produce their solutions on time and on budget. Chances are, you've used some of the software that Intriguing Development has created. From print drivers to complete fax solutions, imaging utilities to firmware, speech recognition to telephony - we've been there.

### Experience

The average Intriguing Developer has 18 years product development experience on the Mac.

That experience means we hit the ground running and focus on your solution with minimum ramp up time.

We can do as much as you require, from design to development of a new product idea, project management, maintenance of existing products, porting across platforms, or the addition of state of the art features to existing products.

Whether you need commercial development assistance or custom development for in-house purposes, we are ready to provide expertise and experience you may not have "in-house".

### Partners

We partner with businesses of all sizes. We work with Small Business, Fortune 500 and Government. No project is too small or too large - we can provide the solutions and the people for the job at hand.

We will work with you to ensure you get the solution you want, in the time frame you need, within the budget you specify.

### Performance and Quality

A Supplier Performance Review report, October 2004, from Dun and Bradstreet rated Intriguing Development at **96 out of 100** for the categories: reliability, cost, order accuracy, delivery/timeliness, quality, business relations, personnel rating, customer support and responsiveness.
